New Product

Advanced Guard Rail Scaffolding Tower

The ergonomic design of the AGR Scaffold Towers lends itself to quick, easy assembly and provides collective fall protection before the operator accesses the platform and cannot be removed before the operative descends from the platform.

- Tamper proof, Advanced Guardrails cannot be removed without descending and removing the platform first.
- Fewer components than braced towers reducing losses on site.
- Faster assembly.
- Recommended by PASMA.
- Ergonomic easy to use design
- Complies to EN1004.
- Correct Guardrail heights achieved every time.
- Collective protection before the operative accesses the platforms.

Special Offer until March

Come and have your training with us and receive 20% off the cost of any AGR tower for 12 months.
