

New Product
BetaGuard Integral Advance
Guardrail System

The Betaguard simplifies tower erection by eliminating the need for both horizontal and diagonal braces, reducing the main components to just 3. Structural safety is also improved with the bracing integrated into the frame.

Applications:

- Oil Refineries
- Power Stations
- Electrical Engineering
- Chemical Plants
- Food Manufacture
- Rail Industry
- Clean Environments
- Gas Industry

Features

- Integral Collective Protection that eliminates the risk of fall from height throughout assembly & dismantle of the tower.

- Eliminate the need for bracing, reducing the number of components
- Reduces the possibility of error when erecting.
- Reduces loss with less number of components.

Specification:

Platform	
Width	1.45ms
Length	1.8ms
Max.Platform Ht.	11.7ms
Working Ht.	13.7ms
