

New Product

Pop Up Access Platform

POP-UP replaces the need for ladders and steps to be used indoors in low level access environments. Its detailed design means that it can offer a multitude of special features that ensure the user has a safe yet simple solution to low level access.

Features & Benefits

- Immediate low level access** - 8 seconds to reach full platform height
- Safe** – designed to be fully stable with a safe working load of 240 kgs
- Platform height** – fully extended platform height of 1.63 mtrs gives an average working height of 3.63 mtrs
- Easy to transport** – compact size and weight means it fits onto a small flat back vehicle and can be delivered by a single person
- Easy to manoeuvre** – smooth rollqcastors system fitted means it can be positioned by a single operative
- Easy to operate** – simple hand set controls all elevation/de-elevation functions
- Training** – product training available
- Battery powered with universal charger**– low usage and ownership costs

Over 300 operations on one battery charge
– can accommodate heavy daily usage requirements.

Specification

- Platform Working Ht . 3.63m
- Platform Ht: Elevated -1.63m
- Platform Rail Ht - 1.1m
- Overall Ht. -1.66m
- Overall Length -1.135m
- Overall width - 0.70m
- Platform Capacity -240kg
- Wt. -225kg
- Power -12v DC electric
